GLUTA-DMG EQ

- An advanced multi-patented, formula for horses to support proper liver and immune system function, endurance, and muscle recovery.
- **A synergistic blend of Gluta-Syn® and DMG that:**
 - Increases antioxidant activity
 - Improves oxygen utilization, performance, and recovery time
 - Strengthens and modulates the immune system
 - Supports liver function
- **Recommended for:**
 - ☐ Immune compromised horses
 - ☐ Liver support and detoxification
 - ☐ Athletes
 - ☐ Respiratory, reproductive, ocular, and cardiovascular support
- **Benefits of Gluta-Syn®**

Extensively tested in studies for its impact on immune system activity, muscle metabolism, longevity and anti-oxidant activity. Provides the necessary building blocks to synthesize Glutathione within the cell. Glutathione is called the master antioxidant of the cell because it regulates other antioxidants and acts as a free radical scavenger and a detoxifying agent.
- **Benefits of DMG**

Anti-stress factor (adaptagen).
Immune system modulator.
Supports the production of Glutathione and SAME.
Many studies show that DMG supplementation helps both humans and animals to adapt to increased physical activity, reduce blood lactate levels, normalize blood glucose, and decreases fatigue. These studies have been verified by numerous researchers.
- **Benefits of combining Gluta-Syn® & DMG**

This combination provides a superior level of support that will support the animals performance, detoxification, decrease recovery time from physical stress and regulate the immune system.
This formula provides a synergistic combination of two very effective products that work on the same health problems from two different directions. This gives the animal a greater opportunity to increase performance.
- **Directions For Use:**

Give one scoop twice daily for the first month and then drop back to one scoop daily. Horses under stress or with an injury can stay on two scoops daily.
- **Gluta-DMG EQ**
